# APPLIED ADVANCE ECONOMETRICS

---

## Solutions Manual to End-of-Chapter Exercises

Feridoon Koochi-Kamali

2021

## Contents

### Part One: Advanced Econometrics I

#### *i. Core Methods*

**Chapter 1** Maximum Likelihood & Other Nonlinear Estimation 02

**Chapter 2** Generalized Method of Moments 07

#### *ii. Microeconometrics*

**Chapter 3** Discrete Dependent Variable Models 13

#### *iii. Panel Data Econometrics*

**Chapter 4** Analysis of Panel Data 19

**Chapter 5** Dynamic Panel Data Models 24

#### *iv. Time-Series Analysis*

**Chapter 6** Forecasting with AR & MA Processes 32

**Chapter 7** Stationary Series, VAR & Granger Causality 42

**Chapter 8** Stationarity Tests, Cointegration and VEC 55

**Chapter 9** ARDL & Panel Data Unit-root Test of Integration 76

**Chapter 10** Volatility Analysis, ARCH & GARCH Processes 81

### Part Two: Advanced Econometrics II

#### *v. Microeconometrics*

**Chapter 11** None-Parametric and Semi-Parametric Econometrics 87

**Chapter 12** Bootstrap 93

**Chapter 13** Hazard Functions & Models of Duration Data 96

#### *vi. Long Panel Data*

**Chapter 14** ARDL Long Panel Cointegration Test & VEC Estimation 113

#### *vii. Time-series Analysis*

**Chapter 15** Spectral Analysis of Time-series 122

**Chapter 16** State-Space Models and Kalman Filter 134

#### *viii. Bayesian Econometrics*

**Chapter 17** Bayesian Econometric Analysis 147

**Chapter 18** Bayesian Simulation Models 152
